

A.L.P. Lighting Components Lithia Springs, GA

A.L.P. Lighting Components, Inc., is a leading global manufacturer of lighting components, offering a diverse line of products for OEMs and the aftermarket. Founded in 1972, A.L.P. has grown from a modest, Chicago-area based operation, to an international powerhouse, with over 600 employees and nine world-class manufacturing and distribution operations strategically located throughout the U.S., Europe, Latin America and South America.

The 133,000 square foot Lithia Springs, GA plant, located outside of Atlanta, houses production and fabrication operations for A.L.P.'s metal products including Steel Craft brand fixture housings, aluminum reflectors, louvers, and baffles. Technical resources at this facility include product design and manufacturing engineering, as well as tool and die services. Other functions include operations management, regional sales and product management for metals and plastics lines. This location also provides complex, high-demand warehousing and distribution services to a number of key accounts in the area, as well as the entire Southeast region
