

WARRANTY:

Our products are warranted to be free from defects in material and workmanship. All LexaLite® luminaires receive 100% quality inspection before shipment to ensure proper and satisfactory operation. When operated under normal conditions, LexaLite products will provide years of dependable service.

CONDITIONS FOR CLAIMS:

If within five years of the date of manufacture, any LexaLite luminaire fails to perform satisfactorily, LexaLite will test and inspect the product, and repair or replace any LexaLite product found to be defective in materials or workmanship free of charge, provided that inspection and testing show that operating conditions have been within specified limitations.

LexaLite will not be responsible for any labor or back charges without prior written consent. This warranty shall be the sole remedy of the Customer, and the sole liability of LexaLite to the Customer.

NO IMPLIED WARRANTY OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE IS MADE, INTENDED OR IMPLIED AND ALL SUCH WARRANTIES ARE EXPRESSLY EXCLUDED.

LexaLite will not, under any circumstances, whether as a result of breach of contract, breach of warranty, tort, strict liability or otherwise, be liable for consequential, incidental, special, exemplary or punitive damages including, without limitation, loss of profits or revenues, loss of use of drivers or any other goods or associated equipment or damages to any associated equipment, cost of capital or labor, cost of substitute products, facilities or services, down time costs, or claims of claimant's Customers. In the event that LexaLite shall be unable to repair or replace a LexaLite product as required herein, the liability of LexaLite to Customer shall not exceed the price paid by Customer for the defective LexaLite product. The foregoing remedy of repair or replacement by LexaLite shall be the sole and exclusive remedy of the Customer, and shall not apply to any equipment of another manufacturer used in conjunction with LexaLite products. Lighting fixture manufacturers, electricians and end users need to ensure product system compatibility before final installation.
