

Vantex™

an **A.L.P.** Brand

A.L.P. is introducing its Vantex™ brand to identify our family of thermoformed plastic lighting products. This group consists of LED-optimized plastic components that provide high transmission and superior lamp hiding. The term Vantex is derived from the concepts of “advantage” and “technology”. A.L.P. backs the Vantex brand proposition with a robust product development plan to support the changing requirements of the lighting market, driven by the adoption of LEDs.

Plastics that Perform.

PRODUCTS
