Asymmetric Lens
Model T620A 2x4

6 Light
Widths:
23-3/4"

Lengths:
47-3/4"
Custom sizes available

Lenses for commercial, institutional, hospital, retail and residential applications

Standard Material:
Acrylic
RFI shielding available

PLEASE INQUIRE FOR FURTHER MATERIAL OPTIONS

Description
T620A Lenses can be assembled in recessed or surface mounted luminaires. The geometric designs of linear axis prisms control the source light to deliver an asymmetrical lighting distribution from 6 light fixtures.

Application
T620A Lenses are suitable for commercial, institutional, hospital, retail and residential lighting applications. A conductive grid which shields electromagnetic interference (EMI/RFI) and complies with the requirements of MIL-STD-461(E) can be supplied on these Asymmetric T620A lenses.

Typical beam distributions are found on the back page. The photometric data from test 0511 shows the beam distribution from a 6-lamp T8 32 watt fluorescent fixture, achieving 10,800 lumens.

Lamp Data
T5, T8 fluorescent and LED sources are generally used with the T620A. There are six distinct nodes across the lens width and it is suggested that the light sources be aligned with these nodes for maximizing the asymmetry of the distribution.

Ordering Information
Please call 877-257-5841 for price and delivery.

Specify lens size when placing an order. Custom widths and lengths are available. Typical lead time is four to six weeks.

Notice
A.L.P. assumes no responsibility for suitability of luminaires and applications. The use of lenses near and above 70°C temperatures with high UV output light sources will cause degradation of the material.
