

Molding Operations Monterrey, Mexico

In addition to our locations in Michigan and Tennessee, A.L.P. now has extensive molding capabilities in the Monterrey, Mexico manufacturing and assembly facility. Services include injection molding, compression molding, and in-line extrusion/thermoforming. The 106,000-square-foot plant was custom built for A.L.P. and is strategically located near customers and shipping hubs.

ETF- Extruder Thermoforming
