

Freestanding Barrier Panels

for Retail, Salon and Office Locations

Available in standard and custom sizes; bases and panels sold separately or as configured systems.

A.L.P. now offers acrylic panel systems to reduce the risk of airborne germ transmission. In addition to standard sizes and configurations, we can design panels for your specific application or installation.

- 3mm (.118") thick acrylic panels are impact- and shatter-resistant.
- Rugged injection molded bases provide secure mounting and can be used with double-sided tape to reduce accidental movement
- Provides improved shielding against droplets
- Hundreds of possible configurations to fit your needs
- Optional pass-through window on many versions
- Available as one per box or multiple kits for improved shipping and packaging costs

9" Base

2 Way Base

90° Base

3 Way Base

4 Way Base

Bases accommodate most .118" thick acrylic panels. Black base color is standard. Gray and Clear options are also available. Please inquire for custom base color.
