

Thank you again for your disclosure in 2024. By joining 12,500+ SMEs, you are a pioneer in the journey towards sustainability and this milestone marks your commitment to driving meaningful change and creating an Earth-positive future. By disclosing through CDP's first dedicated SME questionnaire, you've taken an essential first step toward establishing yourself as a leader in environmental transparency and action.

Data is critical to power the transformative shift our planet and economy need. The data from disclosure is being used by a wide range of stakeholders – across finance, procurement, investment, and policy – to fuel more balanced decisions and enable the green transition.

We are pleased to share your 2024 CDP SME Climate score:

- **SME B for Climate**

You can also access your category scores and disclosure badge below:

Please note: Scope 1 and 2 emissions' category will cover both the 'Scope 1, 2 and 3 emissions'.

Please note: The highest SME score in 2024 is an SME B. The data disclosed this year through our SME questionnaire will be used to develop and deploy a meaningful methodology for an SME A score for 2025 disclosure.

The value of CDP scores

- CDP scores play a critical role in moving companies from transparency to action. There are clear business benefits that come with greater transparency.
- CDP scores consider datapoint alignment with leading frameworks and standards, helping your organization navigate compliance more effectively.
- CDP scores are used by global investors to monitor their own portfolios, assess future investments, and comply with regulation and industry commitments.
- CDP data helps manage increasing risks as a result of climate change, exposing the real economic losses from climate events, the impacts of more sustainable practices and their effect on business models and returns on investment.
- Whatever your 2024 score, it offers a moment to reflect, identify gaps, and consider opportunities for enhanced disclosure in 2025. Use your 2024 disclosure as a foundation to develop transition plans, improve business efficiency, and foster innovation.

What next?

- Your submission data will be shared with your stakeholders/requesters which may include CDP Capital Market Signatories and your customers.
- If your response is public, your data will be available to those who request a license from CDP to access or use the public disclosure data. Core climate data will be available through the Net-Zero Data Public Utility (NZDPU).
- 2024 CDP Public scores will be made available on the CDP website later in 2025.
- If you have any questions about your score, you can reach out to your CDP contact, visit the Help Center, [or read our 2024 scoring introduction.](#)
- As we enter the 2025 disclosure cycle, it provides an opportunity to commit to completing the full corporate questionnaire and taking the next step in driving environmental transparency. CDP will have resources available to support with this.
- In 2025, the focus will be on improving your user experience within the Portal and delivering maximum stability for requestors and disclosers in the next cycle – as a result there will be minimal changes to the questionnaire.

Thank you for taking vital steps to tackle the environmental crisis by disclosing through CDP. We look forward to partnering with you in 2025 to support the critical need for increased disclosure and to drive Earth-positive decisions for future generations, creating a world where people, planet and profit are truly balanced.

Kind regards,

CDP
